

Rotary Vent-A-Matic 101 (Model: M0014)

The Vent-A-Matic is a durable and effective in-glass ventilator that can solve most ventilation requirements. The 101 Rotary Vent is equipped with a diffusing rotor which helps to prevent severe drought and improve fresh air distribution within the room. The rotor also continues to operate whilst under its own inertia, even when air pressure on each side has been equalised.

- The 101 model is most commonly used in toilets, boats, caravans and sheds.
- Requiring a 121mm diameter hole, the total diameter of the vent is 155mm.
- It can be fitted to 4mm or 6mm single glazing, without the need to reglaze.
- Useful when no opening is available or where leaving an open window has safety/security implications.
- **Unlike the 102 version the 101 is not provided with radial shutter control.**
- Designed for simple two part fitting into a glass aperture.
