

Safety One Way Mirror, Mix551, Inside, Silver, 1.52 x 10mtrs ( Model: Q0070 )

- The MIX 551 is simply a stronger one-way mirror film. Owing to its thickness, it forms a membrane that keeps the glass in place, preventing it from shattering in case of explosion or vandalism. The one-way mirror effect plays on the phenomenon of light balance: the film becomes a reflective screen in reaction to a stronger light. It refers to one side as a mirror image while keeping the transparency of glass on the other side. You can see without being seen.

- All premises to protect against intrusion and prying eyes such as computer rooms, warehouses, ground floor premises, etc.

- Internal surface with soapy water.

- Solution of soapy water, 30 days after installation. Products that could scratch the film should not be used. Do not put stickers or any other adhesives on the film.

- 2 years from the delivery. This film should be kept away from excessive moisture and away from direct sunlight at temperature below 38°C.
