

Mirror Safety 060, Silvering 1.22 x 30mtrs 3 Roll Set ( Model: Q0073 )

- This adhesive film should be fixed to the back of mirrors to keep pieces of glass in place case of shock or fire.
- For protection of silvered glass without the use of toughened glass, it is responsible for optical distortions in places open to the public and equipped with mirrors, such as sports halls, dance halls, exhibition halls, elevators, night clubs etc.
- Quick and easy, soak the silvering of the mirror, apply the adhesive side of the film to the silvering and remove the water with a squeegee. You can glue the mirror on after 24 hours. Do not apply stickers or other adhesives to the film.
- No glass maintenance needed.
- It will last more than 20 years for vertical application 2 years from the delivery. This film should be kept away from excessive moisture and away from direct sunlight at temperature below 38°C.
