

RT8 Light Blue (A) (Model: QSF14)

• Stained Glass Art Films are printed or embossed onto high quality polyester base materials using UV stable inks and are easy to apply to glass, plastic and other materials.

• They can even be applied to curved surfaces and are guaranteed not to fade, crack or delaminate.

• The Stained Glass Art Film palette contains a vast selection of colours and textures to appeal to most tastes, and suit all applications, from traditional to contemporary.

• Applications include domestic and commercial windows, doors, ceilings; mirrors, furniture and cabinets, and obscurity levels vary from transparent to opaque, for areas where privacy is required such as bathroom windows.

• Screen images may appear different from the actual film.
