

UV Laminated Glass Bond 'Red' 678-0 (Model: R0029)

- Verifix B 678-0 Lamifix UV-curing adhesive has a relatively thin consistency and is crystal clear.
- Due to its high sensitivity to UV light, it is ideal for bonding laminated glass to glass, laminated glass, metal, wood, stone as well as to many thermoplastics.
- For glass thicknesses up to 6mm.
- Features:
 - For three dimensional bonds
 - For bonding laminated safety glass
 - For bonding glass types with low light transmission (coloured glass)
