

Universal UV Bonding Adhesive 'Black' MV760 (Model: R0029A)

- The UVA-curing adhesive Verifix MV 760 is a high-viscosity, gel-like adhesive which, due to its adhesive properties, is suitable for universal applications.
- It has high strength and is highly resistant to vibration, thus making it ideal for glass/metal as well as glass/glass bonding.
- It features outstanding optical clarity and durable resistance to yellowing.
- Its high resistance to moisture is particularly worth mentioning.
- Verifix MV 760 is mainly used for glass constructions subject to high static or dynamic forces.
- Its high elongation at break compensates for the expansion of different bonded materials without loss of adhesion.
