

12mm Diamond Parallel Fit Electroplated Drill Bit (Model: FPE012)

- 75mm long metal drill bit with diamond tip. For use in manual drills.
- Parallel fit type. The unique electroformed diamond glass drill has a tremendous number of advantages over other types of glass drills.
- Some of these advantages include a thin wall of the tube which allows glass to be cut very fast leaving a very good clean hole.
- The diamond impregnation depth of a standard and thick wall drill is 12 mm.
- These drills are designed and manufactured to cut a large number of holes in glass, ceramics and similar materials giving very good life.
