

Discontinued - See New Improved Model B0089A (Model: B0089)

This self-locking transport dolly is a simple solution to moving glass, drywall, doors, sheet metal and stone panels on site. A compact and easy-to-use device, its robust tyres can safely move sheets weighing up to 250kg across uneven ground.

The popular dolly has an inner lining for extra protection when transporting glass, doors, and drywall panel between 10mm to 70mm thick. Made from steel with a durable powder coated finish, the Self Locking Transport Dolly includes a convenient carry handle and large pneumatic wheels with standard valves so that they can be pumped up to ensure optimum tyre pressure.

Key features:

- Capacity: 250kg
- 70mm maximum sheet thickness
- Dimensions: 300mm(l) x 330mm(w) x 340mm(h)
- Weight: 6kg
- Resilient 260mm tyre (pneumatic)
- Generous payload capacity compared to other transport dollies on the market
- Rust proof due to its high standard powder coating.
