

Glass & Glazing Instalation Device With Sideshift & Winch (Model: B0091)

- The Racelift 3.0 is a versatile 1-man glass mounting device for doors, windows, glass, metal and wood on any construction site. This multi-faceted mounting device makes transporting construction elements childs play.
- Construction elements up to 80 kg can be lifted and lowered by one person, and 2 workers can handle loads of up to 150 kg.
- The mast can be swiveled for 90° to the left, and the suction unit with its two built-in suction discs (diameter 204 mm) can be rotated by 360°.
- The non-slip handles are adjustable for the proper height and length, and the polyurethane tyres (diameter 300 mm) allow the device to safely drive over rough terrain.
- The Racelift 3.0 can easily and quickly be disassembled into 6 parts and fits into any boot.
