

350kg Dual Circuit Battery Powered Vacuum Lift (Model: T.UPG.350.2)

• The UPG 350-2 vacuum lifting device is specially designed for loads of up to 350 kg. Thanks to its modular design, the UPG 350-2 can be optimally adapted to your tasks. With the UPG 350-2, you can manually tilt loads for 90° and rotate them by 360° (position stopped every 45°). Glass elements can be perfectly aligned and inserted into the facade. With its rechargeable battery, the UPG 350-2 is the ideal assembly partner.

• Glass, metal and non-porous materials can be safely and easily tilted from upright to horizontal position.

• Key Features

- Capacity: 350kg.
- Manual 90 Degree Tilting.
- Manual 360 Degree Turning.
- Silicon-free vacuum cups.
- Audio-visual low vacuum warning.
- Integrated vacuum reserve tank.
- Rechargeable 12V Battery & Charger Included.
- Complies with DIN13155.
