

Diamond 76x127mm Dark/Mid/Sea Green ( Model: RFUD08 )

A complete 3 metre kit suitable for 15mm thick toughened (tempered) glass. Suitable for use as a windbreak or balustrade on residential decks, patios, internal stairs, landings, external balconies and edge of roofs, anywhere a 0.74kN/m UDL is required. With 15mm glass this system is even suitable for light commercial installations that are not susceptible to overcrowding. The kit includes the 3 metre top mount channel and all the gaskets and clamps required for a three metre length.

Beautiful and easily maintained stainless steel effect profile.

Suitable for indoor and outdoor installations.

No expensive installation tools required

Super fast and easy installation for even a good DIY person

The glass is adjustable and easily plumbed so that the top edge of all the panels are aligned

If the fall is greater than 600mm then a handrail must be installed when using only to

The glass & fixings must be purchased separately.
