

Infill Part A 0.5 Litre ( Model: W0020 )

- By mixing and adding the range of 12 standard pigments to the 2-part clear base infill resin, it is possible to create infinite colours and shades.
- This complete freedom of colour availability, makes Cadram a unique option for the decorative glass market.
- In addition to these standard pigments, 9 fluorescent colours are available that glow under UV light conditions making these colours ideal for signage or decorative glass design in clubs, restaurants and other commercial applications.
- Also, by mixing controlled quantities of white pigments into colours, an opaque (no-transparent) appearance can be created.
